## HOUSE & GARDEN NUTRIENTS

### PREMIUM NUTRIENTS & ADDITIVES

### Mixing

**Water**  
If using RO water, after filtering, add pH Osmosis/Stabilizer to 100 - 150 ppm.

If not using Reverse Osmosis, consider dechlorinating your water.

**Bases and Additives**  
Mix Base A, Base B, and all of the additives, one by one. Make sure to mix thoroughly between each product.

After adding everything, allow the reservoir to fully mix and circulate for a few minutes.

Then adjust pH according to levels below:

**Adjust pH to:**  
5.7 - 5.9 for Hydro  
5.7 - 6.2 for Coco  
6.2 - 6.8 for Soil

### Pro Tips

PRO TIP:  
Use **Roots Gold** in Soil, Coco, and Peat. Can be used 1/4 - 1/2 strength in most Hydro.  
Use **Roots Silver** for all hydroponic and recirculating systems.

PRO TIP:  
**Top Shooter** and **Shooting Powder** are liquid and powder forms of the same high P-K, late bloom additive.

DO NOT USE TOP SHOOTER / SHOOTING POWDER AT THE SAME TIME.

PRO TIP:  
Aggressive Feeding:  
Increase base nutrient by up to 4 mL per Gallon.
