HOUSE & GARDEN NUTRIENTS

PREMIUM NUTRIENTS & ADDITIVES

3-Part Base Nutrient

CalMag delivers secondary elements for all stages.

Grow delivers base nutrition for all vegetative stages.

Bloom delivers base nutrition for all flowering stages.

Additives

Drip Clean uses ionic bonding to bind excess salts that may accumulate, creating a molecule that removes buildup of minerals in the used system and ensures maximum uptake for the plant.

Roots Excelurator is a formula that provides vigorous and explosive root development. Use at the beginning and until the first weeks of flowering.

Amino Treatment provides the plant with highly available elements and compounds, promoting explosive growth.

Multi Zen aids in the breakdown of nutrients, while increasing flower size. Use in the vegetative phase until the first sign of flower formation.

Algen Extract is a mixture of natural seaweed. Processed in small batches, this extract is highly concentrated & full of highly available components.

Nitrogen Boost provides the plant with a pure, highly concentrated source of nitrogen, resulting in explosive and vigorous growth.

Bud-XL focuses solely on the formation of fruits and flowers. Consisting of key components to facilitate the movement of sugar from the leaves & bracts to the fruits & flowers. This ensures a robust and aromatic yield.

Top Booster triggers the final phase of fruiting and flowering, providing extra phosphorus and potassium while directing all energy toward the fruit and flower sites.

Shooting Powder helps ensure a second wave of flower production during the last weeks of the flowering phase, yields up to 30% more.

Top Shooter is the liquid version of Shooting Powder. It causes more flower production and promotes large and robust formations.
